

**(26/6/11):**

Almost a year after the actual course, there is little to write, except perhaps the about the satisfacttion that the installation in gogbot was succesful.

All students that participated actively in the course made it into the second year. However, that does not give the course any predictive value. The guest speakers were overall positively received, although some students complained that it took them a long time before they understood what the course was all about. Even then, I have some doubt though whether they really understood!
