

Maarten van Steen: now

- Teaching interests:
 - (Complex) networks, graph theory (BA)
 - Distributed systems (MA)
- Research interests:
 - Large-scale (wireless) distributed systems
 - Low-level as well as middleware-level research
 - Experimental (simulations, development)
 - Increasingly more complex-network research
 - Social sciences

Maarten van Steen: then

- Teaching interests:
 - More networks/complexity
 - Algorithms, heuristics
 - Systems, as always
- Research interests:
 - More, better, and deeper understanding of (real world) complex (distributed) systems:
 - Complex networks
 - Relation computer systems - complexity
