L.S.

The Age of Magic project was started by Sven Hazejager and Vincent van Moppes, (students at the Vrije Universiteit Amsterdam) for the course "Object Oriented Programming", in February 2001. Multimedia is also a key element of this project. To help out with the latter part, the abovementioned authors of Age of Magic enlisted the help of various artists. Among these is Mikael Achrèn, who worked on animation and miscellaneous graphics. This document certifies his close participation with the Age of Magic authors since February 2001.
